Visual Communication for the Oil Field

What can RigEye do for your operation?

RigEye provides Visual Communication for all Oil Field Operations and is a superior tool that will enable you to improve Safety, Profitability, Efficiency, Awareness, and Security.

RigEye is a necessary tool that will: help your operation reduce near misses and accidents, deter looting, vandalism, and illegal dumping on all of your facilities. Our system provides visual management for remote frac jobs, improves your driller's connection times, helps reduce excessive mud loss and unnecessary travel expenses.

RigEye allows the Operators, Engineers, Health and Safety Managers, and Drilling Supervisors to have ("real-time") visual communication with your field supervisors from any location. Assess and address important operation decisions via our secure remote access log-in.

RigEye Daily Applications

- » Off-shore Drilling Rigs
- » On-shore Drilling Rigs
- » Secure Remote Access Management
- » Top Drive Video Systems
- » Safety Training
- » Operation Facilities
- » Refineries
- » Water Treatment Plants
- » Access Roads/Guard Shacks
- » Loading Docks

LEARN MORE & SEE IT IN ACTION AT RIGEYE.COM

OFF-SITE/OFFICE USES

Log-in via the secure website to remotely coordinate, assess and address daily operations with your on-site Consultants, Tool Pushers, and Drillers.

Evaluate and implement important operation decisions without making costly trips to the field; keeping rigs online and profitable.

Maintain and analyze daily operations, incidents, accidents or safety issues through a video archive to limit liability.

Create safety training programs using captured video of experienced work crews to train new hires and reduce accidents before they occur.

ON-SITE/RIG USES

RigEye's Top Drive Video System allows the driller to be more efficient and safe while making connections.

This system can also be used to zoom in on your torque gauges, and have a visual record of each joint and what it's torqued to.

Shaker cameras reduce excessive mud loss and save you thousands of dollars on every well.

PTZ (pan, tilt, zoom) cameras mounted on the company man's trailer provide additional security for who's coming on and off of your locations which helps deter vandalism and theft of valuable tools, bits and much more.

Benefits of RigEye

SAFETY

Helps deter accidents, near misses, and provides a safety training tool derived from your actual drilling Operation.

PROFITABILITY

Reduce excessive mud loss, get faster connection times and reach TD in record fashion through our top drive system, and eliminate unnecessary costly trips to the field.

EFFICIENCY

Assist consultants to save time and money with the ability for instant visual communication.

AWARENESS

Keep a closer watch and activity on your rotary table, shale shakers, BOP stack, flow line, flare, pipe racks, mud pumps, backyard, and all operations and facilities.

SECURITY

Deter looting, vandalism, and keep track of who's coming on and off your protected assets.
